C. A. Magrath Addresses Gleichen Electors

C. A. Magrath's meeting last Thursday night in the Gleichen Institute proved quite interesting and was attended by about 150 ladies and gentlemen, representing fairly well both of the great Dominion political parties. Mr. Magrath has always been well received in Gleichen and considered one of the most popular politicians that the district ever had the opportunity of honoring. And it is safe to say that had it not been that harvesting was in full swing he would have had a much larger attendance. Mr. Magrath delivered a very interesting address, although, as he stated, he was far from enjoying good health, having suffered a great deal from hay fever as well as being obliged to travel almost night and day for five weeks in order to present his views to the electors of this big constituency. The Call would very much have liked to produce at least a summary of his remarks, but as it would be of little use to do so, owing to this is some coming on election day, we forego the pleasure, and as, owing to his ill-health, he was forced to cut his remarks very short it might not be considered fair.

Dr. Mayor Rose occupied the chair and in a very brief speech introduced Mr. Magrath, who was followed, in a rather short, comical and sarcastic address, by J. L. Jamieson, of Medicine Hat. The entire addresses occupying scarcely an hour.

The Town Council

Owing to the fact that the Call reporter understood that the regular Council meeting for last Friday evening would not be held on account of the opening concert and dance of the Institute and a theatrical performance in Griesbach Hall, one full staff being thus engaged, we are unable to give a report of the town fathers' actions that evening, further than the motions passed and appearing on the minutes as follows:

Mayor Rose, chairman; Councilors Henderson, Bray, James and Service present.

Ald. Service-Bray: "That the minutes of September 6th be adopted as read."—Carried.

Ald. James-Service: "That the accounts of Gleichen Pharmacy, \$3.60; Waterworks and Sewerage account, \$9.10; G. Tuttle, \$5.00; Gleichen Trading Co., 75; Town Hall pay roll, \$13.19; and Waterworks and Sewerage pay roll, \$32.47 be paid."—Carried.

Ald. Service-Bray: "That all municipal poll taxes due the town of Gleichen be collected."—Carried.

Ald. Bray-James: "That the first, second and third reading of By-law No. 31 to borrow the sum of \$3,000.00 from the Bank of Commerce, for current expenditures be passed."—Carried.

Ald. Service-Bray: "That Mr. A. McLeay be authorized to construct a roof over the ground reservoir, upon instructions from the engineer."—Carried.

On the motion the meeting adjourned.

"Doc" Campbell Is Dead

"Doc" Campbell, the popular C.P.R. conductor, died at Calgary on Sunday. "Doc," as he was familiarly called, was known to everyone in Bow Valley, having been conductor on the Bassano local from its inception, until a few months ago when he was transferred to the "Edmonton Flyer." He was a brother of Hon. C. G. Campbell, attorney-general of Manitoba. The cause of death was pronounced to be angina pectoris. Mr. Campbell had been ailing more or less for the last two years but stuck to his duties till last Friday, when he took to his bed on his doctor's orders. No one suspected that the end was so near, but it came on Sunday from failure of the heart. Among the conductors of western

Canada none was better known or more widely loved than "Doc" Campbell. He had a most lovable disposition. He was born in Burlington, Ont., and came west in his youth when the C.P.R. was being constructed, entering the service of the company at Kenora, and remaining with it ever since. For years he had charge of a train running from Winnipeg and then came further west and lived in Medicine Hat for ten years, after which he resided in Calgary. His loss is greatly felt by his fellow conductors and he will be missed by a wide circle of friends among the general public. He was married and leaves a widow but no children. The deceased was a member of the Perfection Lodge A.F. and A.M.

Frisco Ex-Mayor Gleichen Booster

Francis Ferrier, ex-mayor of San Francisco, Cal., spent a couple of days in and around Gleichen this week and has purchased a farm north of town. When seen by a Call reporter yesterday morning before his departure he proved the most optimistic gentleman we have had the pleasure of meeting for a long time and he will be a good booster for Gleichen. It is five years since Mr. Ferrier first visited Gleichen, although he was last here two years ago. He made a careful survey of the town, minutely examining our business blocks, homes, waterworks and telephones, elevators, etc., and said he thought it was wonderful the strides this town had made, and predicted that if the citizens kept on working we should have no trouble in continuing to be the best town along the line, especially considering the fine agricultural land surrounding. He had a collection of grain he secured during his trips through the district and one in particular he said he was nursing most carefully to show his California friends when he got home which he had taken from H. W. Lee's field of wheat. He expressed the opinion that he could even surprise many of his acquaintances in Calgary with his collection, but when he got home he would certainly amaze his Frisco friends.

Arranging to Bring Emigrants from Lurope

To bring out and place on farms in Alberta desirable immigrants from the country districts of Sweden, Scandinavia, Germany, France and Holland, A. Fryling and C. W. Creighton, the former of whom was for years continental European manager for some of the biggest immigration agencies in America have opened an office in Calgary and will work through the Bow Valley. "It is our intention to bring numbers of immigrants here," said Mr. Fryling, "and although we will not form colonies, we will place them close enough to each other so that they will not feel out of place at first. Only the best class of the farming immigrants from the country districts will be brought here, men and women who have been brought up on farms, and for the most part, people with families. They will be placed in the districts all over the country, so that they will mingle with the people here, and not retain their old world ideas. What we want are people who will assimilate with the Canadians and become the real Canadian citizen and help build up Canada."

Mr. Creighton, who is associated with Mr. Fryling in the enterprise, is himself a Canadian and is a specialist on farm land values. In addition to their immigration scheme, the company, which is to be known as the National Investment Company, will also deal in town property for foreign investors, and already are making arrangements for the introducing of a lot of foreign capital.

In London a man has been sent to jail four months for kicking a kitten to death. A few more sentences of this kind will have a tendency to make people drown their kittens in the future.

The Institute Concert

If success is the reward of endeavor then those members of the Executive Committee of the Mechanics and Literary Institute of Gleichen, who have so consistently worked to that end, have been truly rewarded. On Friday night the official opening of the Institute was consummated by a concert and dance, and the large crowd present easily constituted a record for numbers and mutual enjoyment, which was an ideal augury for the future success of the movement, which will be of an immense advantage to the moral, intellectual and physical welfare of the town and district. The building is 40 feet by 80 feet and contains a reading room 20 ft. by 15 ft. which will be furnished with newspapers from all points, magazines, and a library of miscellaneous literature, also an amusement and committee room, of similar dimensions, where draughts, dominoes, etc., may be enjoyed, both these rooms are plastered and will be warm and comfortable. A roomy vestibule leads to the main hall and gymnasium which is 40 ft. by 60 ft., a size which permits of many in-door games and exercises, to be offered during the coming winter, and will undoubtedly be taken advantage of. Under adverse circumstances and the usual pessimism the organizers have succeeded in bringing the Institute to an established fact and it is now the duty of the people to help by patronage and donations, and, thereby, clear the debt now existing.

Additional interest was given to the concert program owing to the first appearance of five artists from Strathmore, whose generosity in coming to the aid of the object combined with their talent makes their efforts the more praiseworthy. The hall was tastefully decorated, leaving no doubt of loyalty, and the various items of the program were well received. The piano was kindly lent for the occasion by Miss Robertson. As there were no expenses attached to the entertainment the entire proceeds amounting to \$102.75 goes to the Institute funds. Following is a resume of the program—Mr. J. W. Jowett was in excellent form in two numbers, and sang with much feeling and expression, his receiving well-merited approbation. Mrs. Sprague and Mr. Dowse rendered a piano-forte duet in a brilliant manner and won unstinted applause. Miss Dosh proved herself a vocalist of high cultivation and a recall was insisted upon on both her appearances. Mr. Goodham generously filled a vacancy with a comic song. Miss Boles played a pianoforte solo with much taste and delicacy of touch, and was suitably rewarded. Mr. B. Ramsbottom has not been heard to better advantage than in his song, his expression and tone being splendid, and received a warm approval. Mrs. Baumer won out with her quiet, quaint eleventh-century efforts and had to respond to a generous recall. Miss C. McArthur was in fine voice and won unstinted applause for her capable vocalization and clear interpretation of her song, and was also well received in the duet with T. F. Rowe. The latter also being successful in his song. Mrs. Jowett, Messrs. Rowe, Jowett and Ramsbottom rendered a closing quartet with a nice balance of power and tone.

At the conclusion of the concert a dance was then indulged in in a whole-hearted manner such as was healthily to see, during the progress of which ice cream was just as warmly partaken of, being the generous gift of E. L. Cree, and the thanks of all are surely his. The dance was kept merrily on the toe until 1 a.m. when with the singing of the National Anthem ended the most successful convivial gathering ever held in Gleichen. The accompaniments and dances were ably played by Messrs. J. Todd, Dowse and Arnd and Misses Budd and Brosseau.

The highest praise and thanks are extended to the promoters and the ladies and gentlemen who so capably assisted.

What will you exhibit on Oct. 5 and 6.

The Elections Today

The Dominion elections take place today and before the day ends it is expected the results will be known pretty well, although in so great a country as this it cannot be expected that full or exact reports can be obtained within twenty-four hours.

In previous elections the Call has not taken any particular stand, but by request of local representatives of the two great parties the Call ventured an "humble opinion" on reciprocity so soon as the candidates for this constituency were selected. The Call man does not pretend to say exactly how so great and important a trade will effect the Dominion, but believes it will prove an advantage to the entire Dominion. That is only our humble opinion and it is offered without any flourish of trumpets.

The Call also intimated we might refer to the subject as it has been represented by the two great parties during the past twenty years in Alberta, but thinks now it is little use to reiterate the entire history, and will only make use of a remark we heard made the other day which covers the ground in the most precise manner. It was this:

"I have never cast anything but a Conservative vote and I am approaching 60 years of age. Now, I consider the Liberals have stolen our policy, and after waiting and working for reciprocity all these years I cannot but continue to work and vote for these principles."

The Call man would only add to this that he conducted the first conservative newspaper in Edmonton, and one of the first in what is today Alberta. He then advocated and believed reciprocity with the United States a good thing and believes so still.

Then we expected and hoped reciprocity would win.

Today we expect and hope reciprocity will win and feel more certain that it will.

Natural Gas

What will be, when completed a year from now, the largest natural gas distribution system in the world, with the largest supply of gas, the greatest pleasure, the best quality and the lowest cost to the consumer, has been arranged for by the Canadian Western Natural Gas, Light, Heat, and Power Co. Ltd., which has absorbed the Prairie Fuel Gas Co., with its enormous wells at Bow Island, the Calgary Natural Gas Company with wells in East Calgary and Gleichen the Calgary Gas Company, now supplying artificial gas in Calgary, and a number of other companies.

It is the intention of the company to lay a big main from Bow Island across to Lethbridge, thence to Medicine Hat, and then northward as far as Calgary, taking in all intermediate points and supplying gas to all these places at a cost that will be about one-quarter that of coal under present conditions.

The company through their absorption of the Calgary Natural Gas Co., have agreed to carry out the franchises obtained at Gleichen and Strathmore, and have repeatedly given out the statement that a line is also to be run from Bow Island along the main C.P.R. line touching these and other points and to drill at Gleichen and other points.

The work of constructing the main will be undertaken in eleven or twelve sections, and thus the work will be carried on very speedily. The fact that the company has permission to lay its tube along the Canadian Pacific Railway Company's right of way means that one of the greatest obstacles has been overcome. This means that they will supply gas for domestic purposes at 35 cents per 1000 feet, while gas for power purposes can be had at 20 cents per 1000 feet. This will be about one-quarter the cost of coal.

Arrangements have been made whereby farmers living along the pipe line will be able to tap the main for their own use and will get the gas at a nominal price. Just as soon as the distribution system has been completed people will be

able to heat their houses with gas at a cost of about one-quarter what coal has cost. Also they would be able to do their cooking with it. It will be possible to place gas burners in all furnaces, water-heaters and other heating appliances and to burn gas therein. The gas may be turned on in the fall, whenever the cool weather comes and by an automatic appliance, which will regulate the flame according to the heat, keeping up a perfectly uniform temperature, may be left burning until the warm weather in the spring. Instead of speaking of high-grade coal that will hold fire all night, people will be talking about gas that will burn all winter. The benefit that the supply of natural gas will do is almost incalculable. It will greatly reduce the cost of living by cutting fuel bills down to a fraction of their present amount.

Gleichen will be able to offer the cheapest fuel available anywhere to manufacturers establishing their plants here, and it is reasonable to expect that the industrial development resulting therefrom will be enormous. The dirt and dust involved in the burning of coal for domestic and general purposes will be done away with.

It is the intention of the company to supply gas to every town in Southern Alberta, that is within a possible distance of the Bow Island wells. The supply of gas is superabundant, and what will be required will be mains to convey it to the centres of distribution. The company will continue to bore wells, and will have a number of these, sufficient to supply the demands.

Monday Inspector J. A. Markle opened the tenders for the forty-five buildings to be erected on the Blackfoot Indian Reserve for the Indians and awarded the tender to Murray Clark, of Edmonton, who is also building the \$10,000 Indian school and hospital south of Gleichen about one mile. This is only the start of the buildings to be erected for the Indians in accordance with land relinquished. This contract comprises 3 farm houses, 2 granaries, 2 implement warehouses, 1 blacksmith shop, 20 cottages, 15 stables and a laundry.

John C. Buckleys remarked the other day that he was surprised that the Call did not contain last issue the result of the first wheat shipped from Gleichen this season. The Call reporter had to plead ignorance, and Mr. Buckley said that while he could not say exactly how much it was, he was pleased to state his neighbor, John R. Alge, was the first to ship a carload of No. 1 hard from Gleichen this year to Fort William, and that he had received \$1.05 per bushel for it at that point.

Rufus Mace was in town Monday from his farm on Arrowood creek and stated he had already cut 1,150 acres of wheat and at that time had only 250 to cut, which his binders were cutting as fast as it was possible. He said that for eighteen days straight he had been cutting and expected to finish the entire crop and start threshing today, being fortunate in having his own separating outfit. He was more than pleased with the result of his crop this year.

Messrs. McCannan and Ramsay are extending a cordial invitation to the ladies of Gleichen and district to visit their superb display of millinery which will be open to inspection on Monday and Tuesday, Sept. 25th and 26th. Some excellent creations will be on view.

Chas. Marshall had the misfortune last Thursday to have his leg broken just above the ankle, while auto riding with a couple of friends. It appears that as the auto disced the hill leading to the Bow river bridge a sudden turn made to avoid a rut in the road caused it to turn on its side and Charley was thrown from the car.

Steven Williams, Gleichen's most famous second baseman, was in town Monday from the south telling about how much better it is to be harvesting bumper crops than trying to hold down second base on the diamond.

Mrs. Ginn, who has been visiting her brothers, Jas. and A. W. Fe, west of town, for a couple of weeks, left on Monday for her home in Vancouver.

THE CANADIAN BANK OF COMMERCE

SIR EDMUND WALKER, C.V.O., LL.D., D.C.L., PRESIDENT
ALEXANDER LAIRD, GENERAL MANAGER

CAPITAL - \$10,000,000 REST - \$8,000,000

FARMERS' BUSINESS

The Canadian Bank of Commerce extends to Farmers every facility for the transaction of their banking business including the discount and collection of sales notes. Blank sales notes are supplied free of charge on application.

BANKING BY MAIL

Accounts may be opened at every branch of The Canadian Bank of Commerce to be operated by mail, and will receive the same careful attention as is given to all other departments of the Bank's business. Money may be deposited or withdrawn in this way as satisfactorily as by a personal visit to the Bank.

GLEICHEN BRANCH. J. CAMERON, Manager

Gleichen's Meteorological Report

The following weather report is supplied by J. W. Jowett, who is officially appointed by the Dominion Government:

	MAX.	MIN.
Sept. 13	70	45
14	66	38
15	67	32.5
16	61	35
17	59	42
18	59	32
19	56	33

Remember McCannan & Ramsay's superb millinery showing will be held Monday and Tuesday, Sept. 25th and 26th.

A branch of the Over Seas Club was organized at a meeting held in the Institute Monday evening, at which there was a fair attendance, but after electing P. Kelly secretary, it was decided to postpone the election of other officers until the next meeting. The Over Seas Club is a non-party organization, and has for its aim simply the idea of fostering an intelligent interest in the welfare of the British Empire by placing before the individual a clear understanding of the duties, responsibilities and privileges personally implied by British citizenship, and also that all those who call themselves Britishers shall assist in all constitutional ways the maintaining of the prestige of the British Empire.

The Gleichen new C. P. R. station is now completed and it is expected that it will be occupied within the next few days, although the moving of the telegraph wires, instruments, office supplies, etc., necessarily occupies considerable care and time. Already men are engaged pulling down the platform around the old station. A portion of it is to be moved west and north of its present location and the rest of the building south across the track for use as a section house. Work is also well underway towards moving the house switch track.

Jimmy Telford was badly bruised by falling off the tongue of a binder which he and his father were operating a week ago. It appears that while Mr. Telford operated the binder Jimmy took his position on the tongue to whip up the horses and fell. He was caught under the whipple tree and dragged some distance before the horses could be stopped. At first it was feared he had broken some bones, but it appears now he was fortunate enough to suffer only from a few severe bruises.

Today reciprocity and the sun sees the line to their. The result will be interesting.

A LITTLE STORY OF IRRIGATION

There were two men who had two adjoining quarter sections in the Canadian Pacific Railroad's Irrigation Block in Southern Alberta; one was a farmer, the other thought he was. They both got up early in the morning, cultivated their ground and planted their crops. The farmer employed irrigation intelligently; the other man trusted to the Lord to send the water along at the right time.

When the harvest came, the farmer took off 40 1-2 bushels of winter wheat to the acre, the other man took his note to the bank to have it renewed. The farmer made enough off his crop to:

1. Pay for the land at \$25 an acre

2. Reimburse himself for the expenditure in connection with cultivation of his land.

3. And to pay for the fences and other improvements on the land.

Irrigation farming is successful farming because it is business farming. You don't have to worry about weather conditions. Your crop is INSURED and your future and independence ASSURED.

TOWN AND DISTRICT

In the dark a painted face is no advantage.

Nature did not invent marriage certificates.

As a rule it is not advisable to send eggs by mail.

Some two-legged people have four footed manners.

The man who knows you, and is still your friend, is a friend indeed.

In these days a King is a symbol of power, but not a powerful symbol.

It has always been a mystery to us why banks have so many unclaimed balances.

Law is a lottery, and the lucky man with the most money has the best chance to win.

The world will climb closer to the stars when marriage is made more difficult, and divorces easier.

Write this down where you'll see it every day. The time to draw business is when you want business, and not when you have more business than you can tend to already.

The man who get mad at what the newspapers say about him should return thanks three times a day for what the newspapers knew about him and suppressed.

Let us work and stimulate every legitimate enterprise by giving it all the friendly encouragement we can, and unite our industry, intelligence and capital in a common cause for the good of our town.

Any business is more respectable than what is termed loafing. A young man had better sell claims by the pailful than hang around public resorts, murdering time and his own reputation.

Some people never hand in an item of news for publication, but if we happen to miss an item in which they are interested they are sure to hand us a north pole star that would freeze the liver of a polar bear.

When a common earth worm is cut in two, he won't make a fuss about it; but to the tail end will grow a head and to the head end a tail. There will be two worms instead of one. Misfortune often doubles our strength.

Mr. Snell, who has been on the staff of the Traders Bank since it opened in Gleichen, returned last week from a well-earned holiday of several weeks in Ontario, looking much the better of his vacation.

Mrs. Notter and her daughter left on Thursday last for their home in Toronto, after spending a couple of weeks visiting here her sons Richard and Ralph and her daughter Mrs. Cosgrave. They expressed themselves as much pleased with their visit to Gleichen and hope to return at some future time.

Have you any news, tell the editor and he will serve it in a la mode. In case you do not happen to meet him, use the telephone or the mail. You will be helping to make your town paper of greater interest and thereby serve the general community. Whatever news may interest you, must surely interest others.

There are very few "House for Rent" signs to be seen in Gleichen. That is proof of growth and prosperity, but also an indication that more homes ought to be provided for the people who would move here, if houses could be rented. A number of cosy and attractive cottages that can be rented at a reasonable figure is what we need.

Sometimes we risk our reputation prowling around the back alleys looking for news. We would respectfully ask all people who have an item of news that they would like to see in this sheet to tell us all about it, of course it don't matter whether we are in the back alleys or on the main streets when you are telling us about it as it always looks good to us.

Few people have any idea what an incentive it is to both teacher and scholar to know that parents and outsiders are taking a lively interest in their work. We believe the "little folks" at school appreciate such interest more perhaps than the larger ones. Still the effect is not lost on any of them, and we hope every parent will take a hint from this and place the public school on their visiting list.

Every school boy knows that a kite will not fly unless there is a string tying it down. It is just so in life. The man who is tied down by half a dozen blooming responsibilities and their mother will make a higher, stronger fight than the bachelor, who having nothing to keep him steady, is always floundering in the mud. If you want to ascend in the world, tie yourself to somebody.

What happens Oct. 5th and 6th?

There is a difference between a house and a home.

Life is two short to gather the harvest—we can only sow.

Laughter is Nature's rest cure for tired nerves. Let'er go, Bill—ha, ha, ha!

Show me a man who has no enemies, and I will show you a man who has never done anything.

The insane desire to be handsome has made more than one of otherwise sensible girls do some downright crazy thing. The powder and rouge smeared on the freckled cheeks is too apparent a deception for the prudent young man not to see and with which he is disgusted. He hates the taste. A freckled face with common-sense is handsomer than the best powder can make a face.

A beautiful girl is very likely to believe she was made to be looked at; and so she sets herself up for a show at every window, in every door, on every corner of the street in every company at which opportunity offers for an exhibition of herself. And believing and acting thus she soon becomes good for nothing; else, and when she comes to be a middle-aged woman she is the weakest and most sickening of human beings—a faded beauty.

After an absence of many months Rev. H. Fraser, now of Cypress Hills, spent a couple of days in Gleichen last week visiting his sister, Mrs. D. Findlayson, and his many other friends. For many years Mr. Fraser was in charge of the Presbyterian church here, and his friends will be pleased to know that as well as conducting his regular missionary work in the Cypress Hills he has been able to successfully carry on his duties in connection with a valuable homestead and pre-emption.

C. W. Peterson, superintendent of the C.P.I.C., has left Calgary in company with his physician for an extended vacation trip to the Atlantic coast to recuperate from a nervous breakdown suffered by him two weeks ago. Mr. Peterson will visit Hamilton, Ontario, and from the city will go to Atlantic City, N. J. where he will rest until his health is sufficiently improved to permit of his returning to his duties in Calgary. It was feared for a time last week that he would not recover from the attack, but during the present week has improved to such an extent that he was enabled to travel.

H. H. Honens Resigns

The announcement is made at the offices of the C.P.I.C. Co., that H. H. Honens, sales manager, had tendered his resignation, and would leave the service of the company at an early date to devote all his energies to his own large private interests.

Mr. Honens has been connected with the Canadian Pacific Irrigation Colonization Company as its sales manager since its inception, and doubtless has had more to do with the sale of land to actual settlers than any other man in the West. Never as a wholesaler, all his efforts have been directed towards colonization, and a large portion of the company has met with in rapidly disposing of its lands is due to his intimate knowledge of the land business, and his ability to immerse the prospective land purchaser his personal faith in land values in Alberta.

Mr. Honens has practiced what he preached, and today has as evidence, several farms, three of which are amongst the best managed in Southern Alberta.

This is the third occasion that Mr. Honens has attempted to sever his connection with the company in order to look after his own interests. He has been compelled, however, to now arrive at a definite decision owing to the necessity of giving his immediate personal attention to the harvesting of a large crop of over 8000 acres.

ute with "SNAP".

At your dealer's—

Paid for the Privilege

Some people have a great and clear idea of their rights, and don't fail to insist on getting them.

A Toronto woman was sitting near a front bedroom window in order to watch her child, who was getting his first natural sleep after a severe illness. Worn out by work and anxiety the mother fell asleep. She was awakened by an Italian policeman, who was loudly calling "Banana ripe! Banana ripe! Ten cents a dozen!"

Leaning out of the window, the mother put up her hands and begged the Italian to be quiet.

"Aw, what's the matter with you," he said, "I pay ten dollars for holler round the streets."

Complete in itself, Mother Graves' Worm Expeller does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

A few days after school opened a teacher was testing the members of one of her old classes on what they had remembered of the definitions she had taught them during the preceding term. Finally she asked the bright boy of the class this question:

"Now, Robert, tell me what a hypocrite is?"

"A hypocrite," replied Robert without hesitation, "is a kid w'at comes to school w'it a smile on his mug."

Minard's Liniment Cures Dandruff

"Pa, you know you told me to count twenty before I punched another boy?" "Yes." "Well, in order to make it work out right you have got to go around the neighborhood and make the other boys promise to count twenty before they take a punch at me."—Houston Post.

The family man was passing through the market when a sign attracted his attention. It read:

"Poultry Dressed in the Latest Style."

"What do you mean by poultry dressed in the latest style?" he asked the salesman.

"Why, are you blind?" said the dealer, pointing to the plucked chickens with their legs tied. "Don't you see they are hobbled?"

Attacks of cholera and dysentery come quickly, there seldom being any warning of the visit. Remedial action must be taken just as quickly if the patient is to be saved great suffering and permanent injury. The latest discovery of the bowels. The readiest preparation for the purpose is Dr. J. D. Kellogg's Dysentery Cordial. It can be got at small cost at any drug store or general dealer's, and it will afford relief before a doctor can be called.

Felt So Small

Boggs—Did you get in all right last night?
Woggs—Oh, yes.
Boggs—Then, the doors weren't locked as you feared.
Woggs—Indeed they were, but my wife yelled at me as I was going up the steps, so I crawled in through the window.

"Keep your seats, please, ladies and gentlemen," said a theatrical manager; "there is no danger whatever, but for some inexplicable reason the gas has gone out."

Then a boy shouted from the gallery: "Perhaps it didn't like the play."—Tit-Bits.

Ma—"Is the clock running, Willie?"
Willie—"No, ma; it's just standing still and wagging its tail."—Judge.

Aids Nature

The great success of Dr. Pierce's Golden Medical Discovery in curing weak stomachs, wasted bodies, weak lungs, and obstinate and lingering coughs, is based on the recognition of the fundamental truth that "Golden Medical Discovery" supplies Nature with body-building, tissue-repairing, muscle-making materials, in condensed and concentrated form. With this help Nature supplies the necessary strength to the stomach to digest food, build up the body and thereby throw off lingering, obstinate coughs. The "Discovery" re-establishes the digestive and nutritive organs in sound health, purifies and enriches the blood, and nourishes the nerves—in short establishes sound vigorous health.

If your dealer offers something "just as good," it is probably better FOR HIM—it pays better. But you are thinking of the cure not the profit, so there's nothing "just as good" for you. Say so.

Dr. Pierce's Common Sense Medical Adviser, in Plain English, or, Medicine Simplified, 1008 pages, over 700 illustrations, newly revised up-to-date Edition, cloth-bound, sent for 50 one-cent stamps, to cover cost of wrapping and mailing only. Address: Dr. R. V. Pierce, Buffalo, N. Y.

THE SPREADING PLAGUE.

It Has Become, in a Measure, a World-wide Menace.

The terrible bubonic plague, which appeared in Hongkong in 1894, spread from there to Bombay and in the next twelve years carried off more than 6,000,000 victims, has been almost quiescent for the past few years, but in 1910 it appeared in a virulent form in Harbin, has since spread to other cities and is now a worldwide menace.

More alarming than the reappearance of the disease in Manchuria is the discovery of the disease in the eastern coastwise counties of England, where several deaths have occurred.

Until 1906 little was known regarding the mode of propagation of this terrible disease, although the disease itself is as old as history. In 1906 the Indian plague research commission definitely traced the spread of the epidemic to the fleas on the black rats of the country. The rats themselves have the disease. A flea which sucks the blood of the rat takes the germs into its stomach. If the flea bites a human being within a period of three weeks the germs are transferred and the human being contracts the disease.

Until recently it had been supposed that only the black rat is susceptible to the plague and that only the flea known as Pulex cheopis could transfer it. Later discoveries, however, have shown that the common brown rat or Norway rat is also liable to the disease and that it may be transferred by the ordinary rat flea.

Still another matter of great interest has been disclosed by the cases in England, which are not the bubonic, but the even more deadly and more dangerous pneumonic plague. The bubonic form, in which the lymphatic glands swell and suppurate, is transferable only through some such medium as the rat and the flea. The pneumonic form, on the other hand, is directly infectious.—Youth's Companion.

FELLING BIG TREES.

The Great Waste That Comes With Making Up Their Beds.

In logging operations the felling of one of the big trees requires much skill in order that it may not be broken in the fall, as such an accident means perhaps the loss of fully \$500, owing to the value of the wood. As yet, however, the old method prevails of cutting it part of the way through with the crosscut saw worked by two men, the ax being used for an incision on the opposite side, the trunk being felled by means of wedges.

In felling the tree, a number of smaller ones are frequently cut down to form a bed on which it may fall so that it will not break on account of its weight. Here is a great waste, since the felling of a fir 150 tons in weight may require the sacrifice of a group of other trees which at maturity would equal it in size. In the "clearings" may be seen thousands of the young trees which have been cut down merely for "beds."

Undoubtedly a mechanical system could be utilized in the work, such as a portable power derrick, the top of which could be attached to a tree by the block and tackle system, thus allowing the trunk when cut through to be lowered gradually by means of ropes of steel cable without the timber being injured and the crushing of the smaller trees near it.—W. A. Day in Cassier's Magazine.

The Dead Sea Is Spreading.

The Dead sea is encroaching upon the land about it so rapidly in this decade that whole forests of trees which formerly grew at some distance from its banks are now partially submerged. Maps of the sea made twenty years ago show an island near the northern extremity of the lake which was not found during a recent survey, and it is supposed that this has been lost in the rising waters. The Turkish government sold the mining rights on the shores to a syndicate for about \$350,000, and if the sea for some unknown reason continues to rise these holdings will be almost unattainable.

Cards For the Puppies.

A novelty in Paris is the lap dog visiting card. Poms and pugs which go visiting with their mistresses in fashionable circles have their own tiny pasteboard cards tucked away in little pockets of their outdoor coats. Such dogs have two sets of cards, which are duly left on other dogs at the houses where they are calling with their mistresses. One card gives the dog's real name and its race, while the other records its pet name joined to the family name of its owner. Cards are left according to the pedigree of the dog visited.

Australia and Our Canal.

The advantage of the Panama canal to Australia is thus referred to in a Melbourne paper: "It means that in another three or four years we shall have to rearrange our mail service to Europe and our whole oceanic transportation service. The Suez route to Britain will go by the board—must go—because the Panama canal will shorten the journey to and from Britain by several days and thus put all users of the new route in possession of an incomparable economic advantage over users of the old."

A Famous War Fleet.

The battleships of the Atlantic fleet which sailed out of Hampton Roads in December, 1907, on the famous around the world cruise—the Alabama, Illinois, Maine, Missouri, Ohio, Kearsarge, Kentucky, Wisconsin and New Jersey—have passed from the first fighting line. Today every one of them is listed "in reserve," and their places in the fleet have been taken by newer and more powerful ships.—Argonaut.

FELL AMONG THIEVES.

And the Old Man Didn't Know Which Set Was the Worst.

An old man from rural England with his wife was on a holiday in London and decided on an evening at a theater. He looked up the advertisements in the papers and selected a house where "All Haba and the Forty Thieves" was being played. It was a "cheap" house, the price of stalls being given as two-and-sixpence. The farmer was surprised, however, on arriving at the box office to be met with a demand for 6 shillings for the two tickets. The extra sixpence per seat, it was explained, was for booking. Then he was called upon to pay sixpence for a program, and the female attendant who showed him to the seats also asked for sixpence, in addition to which there was a shilling to be paid for hats and coats being taken care of in spite of his protest that they could take care of them themselves. A footstool was brought for his wife and was accepted without suspicion that it would be charged for, but the attendant who brought it demanded another sixpence, and finally opera glasses were handed to them and payment of another sixpence requested. Then the farmer went in search of the manager and, finding him, said in a tone of deepest disgust: "You may do what you like with these tickets. There are so many thieves in front of the house that we don't think we want to see the forty on the stage!"—London Answers.

THUNDERSTORMS.

They Kill Over 300 Persons a Year in Madagascar.

Thunderstorms never occur in the arctic regions, and even the north of Scotland very seldom suffers from such a visitation. The nearer you get to the equator the more frequent and severe are the electric manifestations. In parts of Central Africa the average of thunderous days rises to the astonishing total of 250 per annum.

Yet there are curious exceptions. In Java and Sumatra, both intensely hot climates, there are but ninety-two storms yearly, and in Borneo only fifty.

The Gold coast of Africa has only sixty a year, which is less than occur in Florida, though the latter country is outside the tropics.

In Jamaica there is a thunderstorm every day during the rainy season, which lasts for five months. These storms almost always occur between midnight and 3 in the afternoon.

Perhaps the most astonishing fact with regard to thunderstorms is that the island of Mauritius, which is only 500 miles east of Madagascar, has, on an average, only one thunderstorm in eighty years. Yet in Madagascar the lightning is more destructive than anywhere else in the world, the annual death roll being over 300.—Pearson's Weekly.

Costly Privacy.

Although a waiter, he was very human, so when he perceived that the young couple who had been assigned to his table had many matters tender and confidential under consideration he retreated to a respectful distance and stared at the opposite wall. The restaurant proprietor disapproved of that humanitarian attitude.

"Don't stand away back there," he said. "Go up and hang over that fellow's chair back for awhile."

"Oh, no," expostulated the human waiter. "They want to talk."

"Of course they do," the proprietor retorted. "That is why I want you to butt in. Every time you come near they will send you to the kitchen for a fresh order to get you out of the way."—New York Times.

Grim Relics.

A prison sale is held annually in Paris. The articles offered for sale are the clothes of murdered people, the instruments with which the crimes have been committed and the effects which have belonged to the deceased prisoners. Articles which have been taken to the prefecture of police and have not been claimed are also sold. The proceeds go to the Paris alms-house. Unclaimed jewelry is usually bought by ordinary brokers, but the articles which have belonged to criminals, especially those who are notorious, are bought at high prices.

Dodging a Difficulty.

"Are you going to defend the Sparkler girl a wedding present?"

"No, old Sparkler and I had a squabble yesterday."

"That's too bad. What was the cause?"

"I really can't afford his friendship. He has five marriageable daughters."—Cleveland Plain Dealer.

A Fast Talker.

The orator spoke about the things he had not said, the things he did not believe and the things he would not do.

"That fellow," observed the sailor, "is talking at the rate of about thirty naps an hour."—Judge.

A Faithful Likeness.

Sapleigh—I really don't think the photographer caught my expression, do you? Miss Keen (looking at photo)—I don't see any.—Boston Transcript.

A Strong Player.

Mother—What do you think you will make out of my daughter's talent? Professor—About a dollar a lesson, if the piano holds out.

His Monopoly.

"He has unbounded faith in himself."

"In other words, he has a monopoly of the faith in himself, eh?"—Chicago Record-Herald.

YOU'LL HAVE LESS WORK AND MORE PLAY

IF YOU TRY THE MOONEY WAY

The MOONEY way means more biscuits, less home cooking: Because MOONEY'S BISCUITS are fresh enough and appetizing enough to take the place of the product of your own oven. For the daily meal you'll like

MOONEY'S PERFECTION SODA BISCUITS

They're the crispest, creamiest, most delicious soda biscuits ever produced and they're made in Winnipeg. A Western biscuit for Western people.

In air-tight packages or sealed tins.

LET MOONEY DO IT

THE EARTH'S CHANGES.

What the Fossil Remains of Plants and Animals Tell Us.

There was a time when even the polar regions bloomed with many of the splendid and varied forms of life that now adorn the tropics.

The fossil remains of these ancient forms preserved in the bosom of the rocks carry us back perhaps millions of years in the earth's history and show clearly what wonderful revolutions the surface of the globe has undergone since the first plants and the first animals appeared upon it.

Who would think of meeting a rhinoceros nowadays on the prairies of northwestern Canada unless perhaps a travelling menagerie should pass that way? Yet at one time, as discoveries of recent years prove, a creature closely resembling the rhinoceros of India and Africa dwelt in that now comparatively cold, snowy and barren region.

Remains of these extinct ancestors of an animal that in our day thrives only in the tangled tropical forests and under the hot equatorial sun have been found buried in the Canadian rocks, where now the cold blasts of winter blow over treeless plains and sweep the flanks of ice incrustated mountains.

The rhinoceros of that remote age was no less formidable a beast than its descendants, for the skull of one of the skeletons discovered in three feet long, while some of its teeth are four inches across.

The fossil remains of many other forms of animals have been found in the same region within recent years.—Harper's Weekly.

Charms of Labrador.

People are not apt to think of Labrador as a particularly delightful land to dwell in. No tourist thinks of going there for a summer vacation. Yet if Mr. H. H. Richardson's impressions, gathered while hunting big game, are to be accepted, Labrador possesses charms of scenery that it would be difficult to match elsewhere in the world. The words that he quotes from Balzac, a "Yellowknife Indian," best indicate the nature of these scenes: "You say the kingdom of heaven is good, my father, but tell me, is it better than the land of the musk ox in summer, when the lakes are sometimes misty and sometimes blue, and the loons cry often? That is good, my father, and if heaven is better I shall be willing to dwell there until I am very, very old."—Youth's Companion.

One Man Overcomes a Nation.

Jean Angot, who died in 1551, was a French merchant in the African and East Indian trade. When some of his ships had been taken by the Portuguese he fitted out an armed fleet that kept Lisbon blockaded until the government of Portugal indemnified him for his losses. At one time he was immensely wealthy, but he lost in speculations and in money lent to the king of France, and the closing years of his life were passed in destitution.

The Truthful Milkman.

Mr. Youngwed—We never get any cream on the milk. Why is it?
Mrs. Youngwed—It's all right, dear. I've spoken to the milkman about it, and he explained that they fill the bottles so full with milk there's no room left for any cream on top.—London Telegraph.

No Hope.

"Well, how are you getting on with your admirer, Alice?"
"Oh, I have given up all hope now. We got stuck in a lift for three hours yesterday, and even that didn't make him propose."—Fliegende Blätter.

The Penalty.

"There seems to be a penalty provided for everything but stealing a man's daughter."
"There's a penalty for that too."
"I'd like to know what it is."
"Hard labor for life."—Houston Post.

Those who can command themselves command others.—Hassall.

Up to Date
"Yes, Windy Barker has another big idea."
"Going to put on Shakespeare?"
"No, no. He's getting up a Camorrist vaudeville act."
"A Camorrist act! Why, what do the actors do?"
"Just scream and throw fits."—Cleveland Plain Dealer.

A Reason
"I never judge a woman by her clothes," observed Bilkins.
"No," put in Mrs. B. sarcastically, "a man who gets to as many burlesque shows as you do wouldn't."—Milwaukee News.

A horse will live twenty-five days without solid food, merely drinking water, seventeen days without either eating or drinking, and only five days when partaking of solid food without water.

Baby's Rash Became a Mass of Humor

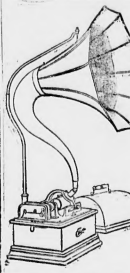

Parents—Decided He Could Not Be Cured. "Cuticura" Soon Made His Skin Perfectly Clear.

A Toronto man, Mr. Robert Mann, of 755 1/2 Queen St. East, says: "Our boy was born in Toronto on Oct. 13, 1908, and when three months old a slight rash appeared on his cheek. What appeared to be a water blister would form. When it broke, matter would run out, starting new blisters until his entire face, head and shoulders were a mass of scabs and you could not see a particle of clear skin. We did not know what to do for him and tried about every advertised remedy without avail. Indeed some of them only added to his suffering and one in particular, the 'Benedict' ointment, put the infant into convulsions. The family doctor prescribed for him. This did not do any good, so we took him to a hospital. He was treated as an out-patient twice a week and he got worse. If anything, we then called in another doctor and instead of a week the boy was, to all appearances, cured and the doctor said his work was done. But the very next day it broke out as bad as ever. "We decided that it could not be cured and must run its course and so we just kept his arms bandaged to his side to prevent his tearing his flesh. The Cuticura Remedies were recommended. We started using them in May, 1909, and soon the cure was complete. Cuticura made his skin perfectly clear and he is entirely free from the skin disease." (Signed) Robert Mann, May 3, 1910.

In another letter, dated June 29, 1911, he adds: "My boy has never had any more trouble since using Cuticura."

For more than a generation Cuticura Soap and Ointment have afforded the most successful treatment for skin and scalp troubles of infants, children and adults. A single set is often sufficient. Although sold by druggists and dealers throughout the world, a liberal sample of each, with 32-p. book on the skin, will be sent free, on application to Poter Drug & Chem. Corp., 58 Columbus Ave., Boston, U. S. A.

TOWN AND DISTRICT

Mrs. W. H. Beal and family returned last week from a visit of a couple of months to her home in Dakota.

Mrs. J. A. Barr returned a week ago from her trip to Victoria, B.C., where she spent a couple of weeks visiting her brother.

Remember the date of the Gleichen Exhibition—October 5th and 6th—and prepare your exhibits.

Mrs. W. R. McKie returned Sunday night from the Pacific coast, where she has been spending several weeks visiting relatives.

Mr. and Mrs. A. H. Zeng and family came from their ranch on Island Creek Monday and are spending a few days in Calgary.

Barr's boasts of 22,683 guests at the hotel last year, yet 20,000 had to seek special accommodation on cars and many others picked the rough side of the mountain.

"Jack" Jones has a force of men installing a new bowling alley in the Gleichen Trading Co. block, and hopes to be ready for business within the next ten days.

Mrs. W. J. McCammon returned home Saturday after spending several weeks visiting relatives and friends at Edmonton and several other northern towns.

Gleichen is spending more money this year to insure a continuance of good health than at the other towns and villages between Medicine Hat and Calgary. Here is something worth while.

In actual town improvement to Gleichen is again making a record this year at the other points or more than 100 in the town, south and west. That is a record for a little town.

The Agricultural Association should be looked to, then, to see every day making a list of themselves in exhibiting everything they are in an effort to win at the prices on the list.

Scientists are responsible for the statement that today's heat is due to the fact that the sun is giving out more heat than it is receiving.

85% of all headaches are the result of eye strain. And you know it is not true if you cannot see. S. L. Tait Optical Co. Calgary.

It is at Yate's drug store, Gleichen, on Wednesday September 21st.

H. H. Eder returned from Bow Island Tuesday, having secured his connections with the Natural Gas Co., and will likely enter into business for himself at Gleichen. His vast experience in drilling will make him an important acquisition to this town and district.

The amount of money being spent in Gleichen this year towards protection is more than all the towns and villages are spending between the Hay and Calgary and for more than 100 in the north or south. Let us all look to this.

On both days of the Gleichen Exhibition, last Oct. 5th and 6th, the Women's Auxiliary of St. Andrew's church will receive money and refreshments on the grounds at moderate prices. This would be a convenience that will be greatly appreciated by the public.

Mr. and Mrs. T. Henderson returned from the coast last Tuesday, where they enjoyed a vacation. And Henderson says that while he enjoyed the trip, he could not help feeling the necessity of returning to the coast, two weeks in the mountains and the sunshine of the coast.

Another enjoyable dance was given at Messrs. Deardorff's last night on Wednesday evening. A number of young people were in attendance and the dance was as the farmers for young people and all other having spent a most enjoyable evening.

It is rumored that within another week the date of the Gleichen exhibition will be announced. It seems the constituency only gets out on one position, then, to get into another. The election will without doubt be the most exciting one in our history.

Due to counter local attractions the Sherman Company, presenting "The Showman," has postponed its visit to the Gleichen Fair Friday evening, was not patronized as it otherwise might have been. The company, however, deserve great credit in that they put on all they advertised before an audience of only about seventy.

Mrs. W. J. McCammon received the mail and goods yesterday morning of the week of the last of the month. She is at the Gleichen Trading Co. block, where she is at the Gleichen Trading Co. block.
